

Dear OB Clinician,

Providing the best perinatal care possible, minimizing the medical risks inherent in this area of practice, and eliminating avoidable adverse clinical outcomes is a shared responsibility. One avenue for achieving these objectives is to assure that your continuing medical education reflects up-to-date national standards and a proven approach to improving clinical practice and reducing adverse outcomes.

Memorial Hermann is committed to sharing in this responsibility, and therefore has partnered with Advanced Practice Strategies (APS) to bring you an online learning e-curriculum, **GNOSIS for Obstetrics**. *At no cost to you*, this course content reflects national standards for perinatal care while directly addressing the primary drivers of obstetrical claims. Further, **following your completion of the required Core Courses**, you will automatically have access to the Competency Maintenance Modules that will provide you with continual education and competency assessment delivered through half-hour clinical scenarios. **Please remember that six credit hours of annual Competency Maintenance modules are required as a condition for reappointment.**

Below you will find a list of the courses available to you.

“APS e-learning is the embodiment of Obstetrics in the 21st century. It is a critical part of staying on top of trends in Obstetrics and avoiding patient harm.”

*- Roger Freeman, MD
Healthcare Indemnity Corporation*

<u>CORE COURSES</u>	<u>CME CREDITS</u>
Fetal Assessment and Monitoring	8.25
Obstetrical Hemorrhage	4.25
Shoulder Dystocia	1.75
Operative and Assisted Vaginal Delivery	2.50
SBAR+R: Structuring Communication in Health Care	2.00

<u>COMPETENCY MAINTENANCE MODULES</u>	<u>CME CREDITS</u>
CM37: Fetal Oxygenation and Acid-Base Assessment	0.50
CM38: Identifying Risk Factors and Recognizing Injuries	0.50
CM39: Induction of Labor and Cervical Ripening	0.50
CM40: Fetal Tachycardia and the Baseline FHR	0.50
CM41: Indications and Guidelines for Performing a Vacuum Delivery	0.50
CM42: Variable Decelerations and the Use of Amnioinfusion	0.50
CM43: Category II Patterns and Recognizing Trends	0.50
CM44: Delivery Management Using a Team Approach	0.50
CM45: FHR Decelerations and Decreased Baseline Variability	0.50
CM46: Monitoring and Intervening for Late Decelerations	0.50
CM47: Teamwork and Technique	0.50

CM48: Managing the Risks of Liability with Fetal Hypoxia	0.50
CM49: Recognition and Management of Abnormal Fetal Baseline Patterns	0.50
CM50: Best Practices in Training and Documentation	0.50
CM51: Appropriate Measures and Tools to Manage Variable Decelerations	0.50
CM52: Understanding Fetal Oxygenation and Assessing Fetal Acid-Base Status	0.50
CM53: Decision Criteria for Performing a Vacuum Delivery	0.50
CM54: Managing Category II Fetal Heart Tracings and Trend Awareness	0.50
CM55: Understanding Labor Induction and Managing Uterine Dysfunction	0.50
CM56: Risk Assessment and Delivery Management	0.50
CM57: Managing Risk with Trial of Labor after Cesarean	0.50
CM58: Managing Risk and the Adverse Neonatal Outcome	0.50
CM59: Best Practices in Management	0.50
CM60: Recognition and Management of Late Decelerations	0.50

We are convinced that together we can achieve the best possible perinatal outcomes for our patients and minimize the risks of obstetrical claims.

Best Regards,

Michael Shabot, MD
Executive Vice President
Chief Clinical Officer

Renee Reimer, JD, CPHRM
Senior Vice President
Chief Risk Officer
